Guidelines on Chapter Management

1. Preamble

- 1.1 This handbook is for Cloud Security Alliance (CSA) Chapters in the Americas Region that are official chapters in good standing as listed in CSA's chapter page at:
<https://cloudsecurityalliance.org/chapters/global/>
- 1.2 This handbook will serve as a guide for CSA Chapters in the Americas region on how to engage their local community.
- 1.3 More information on how to start a CSA Chapter: <https://cloudsecurityalliance.org/chapters/>
- 1.4 Other important CSA Chapter guidelines can be found here:
<https://cloudsecurityalliance.org/chapters/resources/>

2. General Information

2.1. Cloud Security Alliance (CSA)

The Cloud Security Alliance (CSA) is the world's leading organization dedicated to defining and raising awareness of best practices to help ensure a secure cloud computing environment.

2.2. CSA Americas Regional Office

The CSA Americas Regional Office (from now on CSA Americas) is the North America regional office of CSA, located in Bellingham, WA, USA. CSA America's geographical area of operation includes North, Central, and South America. The Chapter Relations Manager is the primary coordinator of CSA Chapters in the Americas region.

2.3. CSA Chapter

CSA Chapters are made up of a group of local volunteer security professionals. The purpose of chapters is to serve CSA as an outreach for research, education and training, and as an opportunity to increase cloud security awareness in the local community. Chapters work to solve cloud vulnerabilities and challenges, by collaborating with other experts in the field to establish cloud security best practices. They offer an opportunity for leadership in regional communities, and thought leadership in the field.

CSA Global highly recommends that chapters become legal entities under the law of the countries they are operating within. *However, this is not a requirement.*

2.3.1. Chapter as a Legal Entity

Where there is a business reason to do so (e.g. manage funds, provide credibility to the organization, etc.), chapters are recommended to become a formal legal entity.

The chapter shall be fully and solely responsible for its own legal and financial affairs and shall

use commercially reasonable efforts to carry **insurance** coverage to insure the risk associated with the chapter's activities, and shall hold CSA Global harmless from any lawsuits, damages, other expenses, or liabilities, arising out of the activities of the chapter.

Importance of Formality

Having a nonprofit corporation legal structure or going under the fiscal sponsorship of another nonprofit corporation, is important for two main reasons:

- 1) accounting of money
- 2) avoiding personal liability

Accounting: If there is any money flowing into and out of the entity, it is important to have structure and formality. If the entity is accepting money for a particular purpose, or there is a donor relationship, then an implied legal obligation to use the funds for that particular purpose is created. With this obligation comes the responsibility to account for the care and expenditure of funds. It is necessary to open a separate bank account so that the money is not commingled with personal money. To open a checking account for the new nonprofit a bank will ask for a banking resolution adopted by a board of directors. Using a personal checking account for an organization's business invites suspicion from others involved and might complicate an individual's personal tax situation.

Avoiding Personal Liability: Having a separate corporate entity, such as a nonprofit corporation, provides protection to individuals from personal liability. This means that if something goes wrong and someone makes a claim that they suffered some injury in the course of the work of the project, the claim will be against the nonprofit corporation and not the individual volunteer or employee. If there is no corporate entity and there is an accident in the course of the work, those involved can be sued personally.

The statute of the chapter must contain appropriate language indicating compliance with CSA Global bylaws. In addition, the chapter bylaws must also comply with the respective national legislation.

Bylaws exist to outline the purpose, objectives, activities, and governance structure of your chapter. CSA requires that chapters-in-information utilize the chapter bylaws template as the foundation for developing its bylaws. Your bylaws must be submitted to CSA in English for approval. (If your chapter operates in a language other than English, a direct translation of these same bylaws should be created and used for the day-to-day governance of your chapter.)

The chapter bylaws should be reviewed periodically (annually, at minimum) by local chapter officers to ensure continued compliance with CSA Global's bylaws, policies, and any changes in local regulations. Any proposed amendments must be reviewed and approved by CSA Global prior to chapter ratification of the amended bylaws. Proposed changes must be sent to CSA's Chapter Relations team *before* the local chapter members votes on them to ensure no portion conflicts with the CSA bylaws and policies.

Note that any chapter incorporated as a legal entity will be required to hold an AGM (annual general meeting). Notes and meeting minutes must be provided to the CSA Global Chapter Department.

**An annual report must be submitted to the CSA Global Chapter Department.*

Please contact chapter-support@cloudsecurityalliance.org if you would like access to the CSA Global Bylaws or would like example Bylaws for your Chapter.

2.3.2 Directors' and Officers' Insurance

It is *recommended* that a nonprofit corporation purchase liability insurance on behalf of its directors and officers to cover certain claims. A directors' and officers' insurance policy ("D&O insurance") will generally provide coverage for liability claims against a director or officer whether or not the corporation indemnifies that individual. Directors and officers will often want the corporation to provide D&O insurance even if the corporation's articles of incorporation or bylaws have generous indemnification provisions.

Additional Resources:

- [Legal Formation for Chapters](#)
- [Finances for Chapters - Best Practices](#)

3. Getting Started

3.1. Membership

Although the CSA Chapter Department leaves the management of local Chapter Individual Memberships primarily to the chapters, chapters should maintain a list of members and their contact information. Chapter information about meetings, events, and other important chapter information should be clearly communicated with chapter members. Member contact lists should be used exclusively for chapter communication and governance.

Membership Management Tools:

- [CSA Circle Platform](#)
 - A CSA Circle Chapter community will be created by CSA Global for each chapter. Chapters can use Circle for membership management. As members join Circle and their respective chapter communities, an automated email can be sent with a welcome note and any pertinent Chapter details. Administrators of the Chapter community have tools to compile all member information, email addresses, and profiles of their community members. Member contact information is to be used exclusively for Chapter communication and governance.
- Meetup
 - Chapters may wish to use Meetup as a chapter management tool. Meetup can be used to sign up new members, communicate about events and meetings, and also used to promote and register members for meetings and events. It would be the responsibility of the Chapter to create and implement an account to use this tool.
- Internal Membership Forms
 - A Google form can be used to collect membership information and retained internally by the Chapter. A Google G-Suite account can be used to create a website, register a domain, and create forms. A G-Suite account would be the responsibility of the Chapter.
- LinkedIn Group

- CSA Global will create a LinkedIn group for the Chapter to use for announcements and basic Chapter communication. *Please note that LinkedIn is not considered a viable solution for membership management. It should only be used to supplement the management tool selected.*

Additional membership information and guidance can be found below in this document ([Section 5](#)).

3.2. Website

A major activity of any chapter is communicating with members on a regular basis. The majority of this communication typically takes place via email, chapter website, Circle, and LinkedIn groups.

CSA Global provides **web hosting services for chapter websites** through use of a standard, but customizable, template. There is no cost to CSA chapters to opt into this program; you simply need to indicate your interest, have chapter leader volunteers willing to dedicate the time involved to be trained, and create your site. This option will be available to your new chapter after the charter has been granted.

CSA Global provides the **contact information of each chapter's members** to the chapter formation chair and, upon formation, to the chapter's membership director, secretary, and president. All information personal or unique to a specific individual ("**Privacy Data**") provided to a chapter is, and will remain, the exclusive property of CSA. Except as CSA otherwise directs in writing, chapters may not use the Privacy Data for any purpose other than for chapter-related purposes. Chapters must use appropriate measures to safeguard the Privacy Data, including measures that are required by law, rule, regulation, or accepted industry practice. For questions about Privacy Data use, please contact chapter-support@cloudsecurityalliance.org.

Chapters must create written guidelines (Privacy Policy) to ensure its compliance with the data security and privacy obligations of its jurisdiction, including internal and external privacy policies, which shall comply with all applicable laws, rules and regulations. Chapters must publicly display (on their website) the Privacy Policy, and provide those written guidelines and policies to CSA Global upon request.

- Chapters are required to post a privacy statement on their website and make it available to their members. Additional guidance can be found here:
<https://cloudsecurityalliance.org/artifacts/chapter-privacy-notice-requirements/>

3.3. Email

It is recommended that the Chapter create public facing email addresses for Chapter board member use. CSA Global can create an official CSA email address for the Chapter's use (up to 3 email addresses per chapter). Or, the Chapter can create their own email addresses. This can be done through Google G-Suite or another platform of the Chapter's preference.

3.4. Circle

Circle is CSA's community forum platform. A Circle Chapter community will be created for each chapter's use. The Circle Chapter community is a place for Chapter communication, discussion, and collaboration to take place. It is good practice for board members to share chapter details/info/meetings/events in their Circle Chapter communities. Chapters can use Circle for membership management as well. As members join Circle and their respective Chapter communities, an automated email can be sent with a welcome note and any pertinent chapter details. Administrators of the chapter community have tools

to compile membership information, email addresses, and profiles of their community members. This makes it a more effective tool than LinkedIn or Meetup. The Circle platform also presents opportunities for Chapter members to engage with other CSA communities (e.g. 30+ research working groups, subject matter experts, job board, membership user councils).

3.5. Social Media

CSA Global will create a LinkedIn group for each Chapter. Board members can be added as administrators of the group. Additional social media accounts can be set up by the Chapter at its discretion (e.g. Facebook, Twitter, YouTube).

3.6. Eventbrite

For events, Eventbrite can be used for event registration. Links on the Chapter website, Circle platform, and event notices can link to the Chapter's Eventbrite account. An Eventbrite account is free and can be set up by the Chapter.

3.7. Governance

- All official CSA Chapters agree and abide by the CSA Chapter [Code of Ethics](#).
- Chapters shall establish and maintain bylaws. This document serves as the rules by which the chapter operates.
- Chapters must ensure compliance with all tax, privacy, and local/state or district/national laws applicable in their country.
- Chapters must abide by CSA trademark usage requirements and CSA branding guidelines.
- Chapters must create and publicly display/share a Privacy Policy.

3.8. Leadership

- There are five required officer positions: President, Secretary, Membership Director, Treasurer, and Program Director.
- Additional positions may be added as needed:
 - Vice President
 - Speaker Coordinator
 - Sponsor Coordinator
 - Website Coordinator
- These positions may only be held by CSA members who do not hold a leadership position in a competing security organization.
- No more than two people should be on the board from the same company.
- A member from another security chapter organization may join as a member of a CSA Chapter however, they may not serve as a board member.

3.9. Dues and Funding

- The chapter will determine its own membership dues or may choose to not charge dues.
- Chapter member dues are to be collected by the chapter, if applicable.

3.10. Chapter Minimum Activity Requirements

- Participate in monthly chapter leadership calls.
- Maintain an active chapter community on the CSA Circle platform.
- Provide CSA global with Board of Director meeting minutes.
- Choose event themes based on CSA's research topics.

- Provide CSA Global with a list of board member names and contact details.
- Hold a minimum of three member meetings within the calendar year.
- Hold a minimum of four Board of Director meetings per year.
- Provide an annual status report to CSA Global on: chapter meetings, non-member events, special activities, and changes to the chapter leadership.

3.11. Funding

In order to support its mission and activities, CSA Chapters might need to seek financial contributions and sponsorship. Chapters can secure funding from various sources. Funding received by the chapter should be used for events, research, or membership activities that help promote the objectives of CSA and the chapter.

Neither CSA Global nor its chapters exist for the purpose of capital accumulation. However, in managing chapter affairs, it is necessary to ensure that most projects financially break even after actual expenses are deducted. Any surpluses that result should be used to maintain an adequate financial reserve and fund additional chapter educational offerings or other member benefits.

It is often useful to have **donations and sponsorships** from other organizations to help start the chapter and for future chapter activities. CSA chapters must remain completely independent from any other entity, except for CSA Global, with which they have an innate connection. It is not permitted for a sponsor to be a parent entity of a chapter.

Sponsorships and alliances can be delicate to balance. We understand and appreciate the support third parties provide to chapters; and at the same time, we are unwavering in our insistence that chapters operate autonomously from third parties. It is also critical to ensure chapter events do not evolve into a marketing platform for vendors or sponsors. Sponsors are never considered official representatives of CSA services.

Chapters need to make clear the distinction between a chapter sponsorship and CSA Global sponsorship (Corporate Membership).

In lieu of legal status, a Chapter may be able to find a *Fiscal Sponsor* to collect and distribute the funds on the Chapter's behalf.

3.11.1. Legal

Chapters that would like to collect funds directly may need to be a legal entity, per applicable local law.

3.11.2. Funding Sources

Funding for chapters can come from sponsorships or dues derived from the following:

- Research Activities (e.g. Local Research or Regional Chapter Research)
- Events (e.g. CSA Chapter Forums, Chapter Meetings and Networking Sessions, CSA Trainings, Third Party Events)
- National Corporate Membership
- Chapter Individual Membership
- Funding for Signing of a CSA Corporate Member

- Webinar Sponsorships
- Sponsorship Logo placement on Chapter Website
- Procuring cause of CSA Global on-site training delivery
- Procuring cause of CCSK exam token bulk sales
- Procuring cause of the CCSK Self-Paced Training License bulk sales
- General Chapter Sponsorship
- Circle Chapter Community Sponsorship

Additional Resource:

- [Funding Your Chapter Through Sponsorships](#)

More information about the above activities is provided in this document. If you have any questions about funding, please feel free to contact chapter-support@cloudsecurityalliance.org.

3.11. Logos and Branding

CSA will create a chapter logo and badge for each Chapter. Badges can be used for LinkedIn Group logos, or as applicable.

Chapters will follow CSA branding guidelines and will not misrepresent CSA or the use the CSA or chapter logo without prior permissions.

CSA logos and branding guidelines can be found here: https://drive.google.com/drive/folders/1-vHM_HS9NIQgw1DXsxE_Mgy4_ean4Z

Additional Resources:

- [Chapter Startup Best Practices](#)
- [Additional Chapter Best Practices and Resources](#)
- [Privacy Notice Guidance](#)

4. Communications

4.1. Communication with CSA Global

Chapters are requested to maintain regular communication with the CSA Chapter Department. As a matter of good practice, the chapters should send any request to chapter-support@cloudsecurityalliance.org. Chapters should also maintain a communication plan.

4.1.1. Means of Communication

The objectives of such a communication plan are to:

- Keep the CSA Chapter Department updated on chapter activities.
- Inform the CSA Chapter Department of relevant local news related to the chapter's geographic area of operation.
- For chapters to request support from the CSA Chapter Department.
- For the dissemination of CSA Global updates, information, and research from the CSA Chapter Department to the chapters.
- To provide an open communication channel between the CSA Chapter Department and

the chapters.

The main means of communication with the CSA Chapter Department are:

- chapter-support@cloudsecurityalliance.org
- CSA Circle Platform
- CSA Americas Chapter Leadership Calls
- CSA Americas Chapter Email List

Any request for clarification about the communication channels between the chapters and the CSA Chapter Department should be sent to chapter-support@cloudsecurityalliance.org.

Contact List:

- **Support:** chapter-support@cloudsecurityalliance.org
- **EMEA Chapter Coordinator:** cozan@cloudsecurityalliance.org
- **Chapter Relations Manager:** tedison@cloudsecurityalliance.org
- **Membership:** membership@cloudsecurityalliance.org
- **Research:** research@cloudsecurityalliance.org
- **Training:** training@cloudsecurityalliance.org

4.2. Communication Between Chapters

Chapters are encouraged to maintain open communication channels with other chapters. Such communication channels can refer to CSA-provided resources or any other communication channel of the chapters' choice.

4.2.1. Means of Communication

Chapters play an important role in the CSA ecosystem, helping to spread the word about CSA at the local level. Open communication channels between CSA Chapters can only foster a stronger chapter base and facilitate collaboration between chapters on a global and/or regional level. At the same time, chapters tend to face common problems and such communication channels can enable them to help and advise each other when problems are encountered.

The main means of communication between chapters include:

- CSA Circle Platform
- CSA Americas Chapter Leadership Calls
- LinkedIn Groups

4.3. Communication with other Stakeholders and External Communication

Chapters should establish a reliable and regular communication plan with their members. Reliable communication refers to messages that, when sent, can reasonably expect to be received by the recipient. For example, social media does not count as reliable communication because one cannot reasonably expect social media messages to be received by all intended recipients. Having said that, although social media channels are generally unreliable, they can still be a crucial part of a communication plan.

Regular communication will help prevent instances where chapter communications are treated as spam. Regular and predictable communication tends to be perceived as legitimate whereas irregular ad-hoc messages tend to be perceived as spam.

4.3.1. Means of Communication

The communication channels will not only aim to keep chapter members up-to-date on information about events, research, and CSA-related news, it will also be a valuable resource that the chapter can rely on when coordinating activities.

The communication channels for chapters can include:

- Circle Chapter Community
- Chapter Mailing List
- Chapter MeetUp
- Chapter Calls
- Chapter LinkedIn Group Announcements
- Chapter Facebook Accounts

Upon request, CSA may be able to provide support for these communication channels. To initiate such a request, please contact chapter-support@cloudsecurityalliance.org.

4.3.2. Email

It is recommended that the Chapter set up a public facing board member email list using the Chapter domain name. This can also be done through Google G-Suite or other platform of the Chapter's preference.

4.4. Chapter Outreach

A mature and reliable chapter communication plan can potentially increase the outreach capabilities of a chapter making CSA Chapters viable partners in co-marketing activities, thus, providing value both to CSA Chapter members and to event organizers.

Additional Resource:

- [Chapter Partnering and Outreach](#)

5. Membership

5.1. CSA Corporate Membership

CSA Corporate Membership (e.g. Solution Provider, Enterprise, and Executive Corporate Membership) is a membership category where the corporate member will be recognized by CSA Global. More information on CSA Corporate Memberships can be obtained by contacting membership@cloudsecurityalliance.org or chapter-support@cloudsecurityalliance.org.

Chapters need to make clear the distinction between chapter sponsorship and CSA Global sponsorship (Corporate Membership) to potential sponsors.

5.1.1. Eligible Funding to Chapters

Chapters are eligible for funding upon the successful signing of a company to one of the CSA corporate memberships. The objective of this arrangement is to reward and encourage chapters to continue to grow the CSA ecosystem by having more companies join CSA.

Option #1 – Providing a Lead:

1. The Chapter provides a membership lead to CSA Global, documenting initial

correspondence and emailing referral@cloudsecurityalliance.org, cc'ing: chapter-support@cloudsecurityalliance.org.

2. Upon completion of a signed agreement and receipt of payment, the Chapter will be eligible for a proportion of revenue:
 - 5% of initial membership payment (Cold Lead – additional work from membership team needed)
 - 10% of initial membership payment (Hot Lead – ready to sign)

Option #2 – Providing a Signed Agreement:

1. The Chapter presents a signed membership agreement to CSA Global (a membership agreement can be provided by the CSA Chapter Relations Manager).
2. Upon receipt of payment, the chapter will be eligible for a proportion of revenue:
 - 20% of initial membership payment

5.2. Chapter Individual Membership

Chapter Individual Membership refers to a membership category that consists of chapter members in an area that are interested in being active in the local chapter. Chapters with an active membership base have a larger audience and are able to increase the visibility and influence of CSA in the local community.

5.2.1. Membership Benefits

Chapter Individual Membership is usually complimentary. However, chapters can create different chapter individual membership tiers and charge annual dues to chapter members to enjoy membership benefits.

The benefits of the memberships are to be agreed upon with the CSA Chapter Department. They may include:

- Discounted rates for third party conferences
- Discounted rates for chapter events
- Complimentary STARWatch License
- Discounts on CCSK Exam Tokens
- Discounts on CSA Knowledge Center Licenses (online training courses)
- Discounts on CCSK, CCAK, and other online training courses
- Complimentary access to CSA Global Events (e.g. US Federal Summit, SECtember, etc.)
- Discounts to third party events (SecureWorld)
- Complimentary access to chapter meetings and networking events

5.2.2. Membership Management

Although the CSA Chapter Department leaves the management of local Chapter Individual Memberships primarily to the chapters, chapters should maintain a list of different types of members and their contact information.

Chapters must create and publicly display and share a Privacy Policy based on how they collect and use member data. A guidance document has been created to help chapters create their own privacy policy. <https://cloudsecurityalliance.org/artifacts/chapter-privacy-notice-requirements/>

Membership Management Tools:

- CSA Circle Platform
 - Chapters can use Circle for membership management. As members join Circle and their respective Chapter communities, an automated email can be sent with a welcome note and any pertinent chapter details. Administrators of the chapter community have tools to compile all member information, email addresses, and profiles of their community members.
- Meetup
- Internal Membership Forms
 - A Google form can be used to collect membership information and retained internally by the Chapter.

LinkedIn is not considered a viable solution for membership management.

5.2.3. Membership Dues

If chapters charge annual dues for Individual Chapter Memberships that include benefits provided by the CSA Chapter Department, CSA Americas reserves the right to a percentage of the Individual Chapter Membership dues. CSA Global will only execute this right in extreme situations.

6. Research**6.1. Chapter Participation in CSA Global Research**

Industry research plays an important role in the CSA ecosystem, creating industry best practices for security in the cloud as well as other technologies. CSA chapters are encouraged to be part of this ecosystem by contributing to CSA research initiatives.

Current CSA research projects that require feedback from volunteers are available at:

<https://cloudsecurityalliance.org/research/contribute/>. Other potential research activities that CSA chapters can be involved in include:

- Participate in dissemination of CSA Global research
- Participation in execution of CSA Global research
- Creation of research webinars
- Creation of unique research
 - must follow the CSA research lifecycle
- Creation of a unique research working group
- Creation of a research survey
- Translation of CSA Global research into a local language

6.2. Chapter Participation in Regional Research

Regional chapter research refers to collaborative research undertaken by chapters in a region (e.g. North America, Central America, South America). By collaborating on a regional platform, chapters can conduct research to address common problems faced by the industry throughout the region.

Regional chapter research activities can be proposed at the CSA Americas Chapter Leadership calls where they will be discussed. These research activities can include:

- Market research

- Surveys
- Policy analysis
- Research webinars

Chapters agree to adhere to:

- The CSA Chapter [Code of Ethics](#)

6.3. Chapter Participation in Local Research

Besides CSA Global and Regional Chapter Research, chapters can also participate in or create their own local research. Local research refers to research undertaken by a particular chapter within the geographical area of operation of that chapter. Local research will be under the jurisdiction of the chapter. Chapters should possess all the resources needed to carry out local research, however, should a need arise, a request can be made for CSA Global resources.

6.4. Research Sponsorship

Once a research proposal is defined, chapters can start sourcing for potential companies interested in sponsoring the research. Sponsoring companies can enjoy benefits that include logo recognition on the research, on the website, and mention in press releases. These research sponsorships can be a source of funding for CSA chapters. Sponsorship pricing of research, surveys, and webinars is set by CSA Global. Chapters should seek approval from the Chapter Relations Manager when securing sponsorship. Sponsorship revenue to the chapter is contingent upon how many CSA Global resources are needed to produce, design, distribute, and market the research deliverables.

7. Events

7.1. CSA Chapter Forum Event

Chapters have the opportunity to run their own chapter-branded CSA Forum Event, or join forces and co-host a Forum with another chapter. However, if a chapter is not ready to run their own Forum, they can approach the CSA Chapter Department and negotiate an alternative activity or event.

This may include:

- CSA Chapter Meetings and Networking Sessions
- CSA Trainings (CCSK, CCSK Plus, CCAK, etc.)
- Webinars

7.1.1. Sponsorship Aid for Chapter Forum

Upon request, CSA Global may be able to aid the chapter in Chapter Forum sponsorship. However, in the event that substantial financial support was rendered to the chapter in the management of their Forum, CSA Global may request a portion of the profits of the event. Chapters should refer to the CSA 'Event-in-a-Box' documentation for further details.

7.2. Event Marketing Material and Guidance

7.2.1. Sponsorship Prospectus Template

The Sponsorship Prospectus Template is a template that chapters can use to create their event sponsorship prospectus. Sponsorship prospectus are documents provided by the chapter to

potential sponsors of a chapter event so that the potential sponsor can get a better idea of the event and decide which sponsorship tier they are interested in, should they want to sponsor the event.

Important information to include in a sponsorship prospectus are the various sponsorship benefits, event details, price of sponsorship, target audience, event description and others.

A sponsorship prospectus template can be obtained from the Chapter Relations Manager.

7.2.2. CSA Collateral for Events

Limited collateral can be obtained from CSA Global, although chapters are encouraged to use their own printing resources to produce hardcopies of the materials. The following CSA collateral is available for chapter use:

- CSA Overview Brochure
- CCSK Overview and Guide
- Cloud Controls Matrix (CCM) Brochure
- CSA Security, Trust and Assurance Registry (STAR) Brochure
- Advanced Cloud Security Practitioner (ACSP) Training Brochure
- Global Consulting Program Brochure
- Certificate of Cloud Auditing Knowledge (CCAK) Brochure
- CSA Corporate Membership Brochure

The above collateral can be obtained here:

<https://drive.google.com/drive/folders/1eNkqGFehL7D94zQHwuE8Saj0n5IIYO76>

If you are interested in organizing a CCSK training course for your chapter or chapter event, please contact chapter-support@cloudsecurityalliance.org.

7.3. CSA Chapter Meeting and Networking Session

A CSA Chapter Meeting and Networking Session is an evening seminar and networking event. Chapters should plan for 1-2 hours of speakers, with networking to follow. Sponsorship can be obtained to cover the costs of venue and food. If a chapter is not a legal entity, the sponsor can pay directly for the venue or food costs.

7.4. CSA Trainings

CSA Chapters are encouraged to organize CSA training classes. These training courses are an excellent opportunity to educate the community and spread CSA outreach. They are also a potential revenue stream for the chapters.

CSA training courses must be conducted by CSA Authorized Instructors and CSA Authorized Training Providers. A list of authorized training providers can be found on the CSA website:

<https://cloudsecurityalliance.org/education/training-partners>.

These events may include:

- CCSK Foundation and/or CCSK Plus Training Courses
- CCAK Training
- Advanced Cloud Security Practitioner Training

7.5. Third Party Events

Chapters can participate in third-party cyber/cloud security events in their country. Participating in such events can be beneficial to CSA and the chapter. These events can be leveraged by the chapter to recruit more chapter members, spread CSA outreach, and raise the profile of the chapter locally.

Support for these third-party events can include co-marketing activities such as:

- Social media outreach (e.g. Email blast, Twitter, LinkedIn, Facebook, Circle)
- Event listing on chapter website
- Event listing on CSA Circle platform
- Promotion of event to chapter members

7.5.1. Marketing Benefits

Chapters can arrange for benefits that can potentially aid the chapter in their mission. These benefits include:

- Speaking opportunities (e.g. panel discussion or break-out track)
- Table-top booth at event
- Banner placement
- Discount on conference passes for chapter members
- Free passes for chapter board members
- Logo placement on collateral

7.6. Chapter Funding from Events

Sponsorship of events such as a CSA Chapter Forum, CSA training, and Chapter Meeting and Networking Seminars can help provide funding for the chapter.

7.7. CSA Chapter Department Support

Upon request, the CSA Chapter Department may be able to provide support to CSA chapters in the running of their events. Support from the CSA Chapter Department for chapter events is only meant to augment existing promotional activities by the chapters. Ultimate responsibility for the success of a chapter event lies on the chapter.

Support from the CSA Chapter Department for chapter events might include:

- Sourcing of speakers
- Sourcing of sponsors
- Visibility on CSA event website
- Visibility on CSA Circle platform
- Social media support (e.g. Twitter, LinkedIn)
- Access to the CSA Solution Provider Council
- Provision of CSA research
- Provision of CSA collateral

Additional Resources:

- [Exhibiting at Conferences and Trade Shows](#)
- [Chapter Speaker Guidelines](#)

8. Education and Training

8.1. Chapters as Training Providers

Official CSA Chapters have the opportunity to become authorized training providers and host CSA sanctioned education and training courses. This is a potential revenue generating opportunity for chapters that have obtained legal status.

- Chapter must be a legal business entity
- CSA Global will determine if chapter is healthy enough to act as a training provider
- Several Chapters are succeeding with this model (Colorado, Delaware Valley, Norway, Italy)
- Two options:
 - Inhouse Authorized Instructors
 - Hiring Authorized Instructors

8.2. Benefits for Board Members as Authorized Instructors

CSA provides active CSA chapter board members the opportunity to become authorized instructors and trained in the CCSK course delivery. There are opportunities for training course waivers for active chapter board members in the CCSK, CCSK Plus, and the Train-the-Trainer. The benefit for the chapter is the opportunity to generate revenue by offering the CCSK course to chapter members, the community, or at events, with a percentage of royalty fees returning back to CSA Global.

- We want to encourage chapter leaders to become CSA Authorized Instructors
- Assistance with discounts on training provider delivery of CCSK Plus (amount varies). Self-paced version coming in 2022.
- Free CCSK Exam Tokens (a \$395 value)
- Free access to the self-paced online CCSK Authorized Instructor Train the Trainer course (a \$700 value)

8.3. Engagement with Existing Training Providers

Chapters can request collaboration with existing training providers to provide a CSA training at their Chapter Forum or Event.

- CCSK or CCAK trainings at Chapter Forum or Chapter Event
- Chapters can freely engage existing training providers
- Chapters are solely responsible for agreements set up with those training providers
- Any Discounts off minimum pricing must be requested of CSA Global by the training providers

8.4. Referral Fees for Chapters

Chapters with legal status have the opportunity to earn revenue for their chapter through the following activities:

- Act as procuring cause of CCSK exam bulk token sales
- Act as procuring cause of CSA Global on-site training delivery
- Act as procuring cause of bulk CSA online learning license sales
- Payment is to chapter, which must have legal entity status and chapter bank account

Additional Resource:

- [Training Opportunities for Chapters](#)

9. Resources and Tools

9.1. Logos and Branding

CSA will create a chapter logo and badge for your Chapter. Badges can be used for LinkedIn Group logos, or as applicable. CSA logos and branding guidelines can be found here:

https://drive.google.com/drive/folders/1-vHM_HS9NIQgw1DXsxE_Mgy4_ean4Z

9.2. Provision of Resources and Tools by the CSA Chapter Department to Chapters

The CSA Chapter Department provides resources and tools to support chapters in day-to-day activities, and the organization and coordination of events and research activities. The tools provided aim to help chapters mature by providing guidance on marketing and avenues of support when advice is needed.

The following are supplemental resource documents that can help aid in Chapter management. All supplemental resource documents can be found here:

<https://cloudsecurityalliance.org/chapters/resources/>

- Chapter Charter Guidelines
- Official Chapter Handbook
- Board of Directors
- Legal Formation and Bylaws
- Finances for Chapters
- Sponsorship Guidelines
- Sponsorship Template
- Speaker Guidelines
