

TAISE FAQ

Explore the Trusted AI Safety Expert Training and Certificate

General Information

What is TAISE?

Created by the Cloud Security Alliance (CSA) and Northeastern University, the [Trusted AI Safety Expert \(TAISE\)](#) program is a rigorous, research-backed certificate program for professionals who build, manage, or audit intelligent systems. It delivers a **10-module training course** with **both instructor-led and self-paced options**; with topics ranging from AI architecture and lifecycle risks to ethics, governance, and cloud security in AI environments; as well as a final **certificate exam**. Through this program, learners gain practical tools to drive responsible AI development, deployment, and adoption in their organizations.

What are the benefits of earning TAISE?

Earning TAISE equips professionals with:

- **Career Advancement:** Showcase an industry-leading credential that validates your ability to ensure the safe, secure, and responsible development and deployment of AI systems
- **A Recognized Credential:** Earn a digital badge and certificate co-issued by CSA and Northeastern University to showcase on LinkedIn, resumes, and professional profiles
- **In-Demand Skills:** Build practical expertise across the AI lifecycle and learn to work with industry frameworks (CSA's AICM, NIST AI RMF, ISO, MITRE ATLAS, and more)
- **A Trusted Partnership:** Developed by CSA, the global leader in cloud security standards, and Northeastern University's Institute for Experiential AI, TAISE blends academic rigor with real-world application

Who is TAISE for?

TAISE is tailored for IT and security professionals interested in expanding their knowledge of AI best practices. This includes AI developers, practitioners, auditors, compliance and governance professionals, and others who are committed to integrating safety protocols into AI technologies. **You'll benefit most if your role involves:**

- Driving organizational AI strategies and aligning AI initiatives with business needs
- Developing and enforcing standards for ethical AI use
- Designing AI documentation to reduce legal and reputational risk
- Applying minimization, anonymization, and governance practices across the AI lifecycle
- Identifying and mitigating AI-specific threats
- Applying frameworks such as NIST AI RMF and MITRE ATLAS
- Securing MLOps pipelines and strengthening incident response across AI and cloud environments

Are there prerequisites?

No prerequisites are required before you take the TAISE training and exam. A basic familiarity with AI, cloud, and cybersecurity concepts is recommended. For foundational knowledge that will aid in your understanding of the TAISE material, consider exploring CSA's [Certificate of Cloud Security Knowledge \(CCSK\)](#) first.

How do I access the TAISE program?

The TAISE **self-paced training package** is [available to purchase](#) on the CSA Training site for \$795.

TAISE **instructor-led training courses** are posted on the [CSA Training Schedule](#) when available.

Both options include:

- 10 training modules, either self-paced on the CSA Training platform or taught virtually by a certified instructor
- A comprehensive study guide
- An exam token with 2 attempts (valid for 2 years)
- Access to the TAISE Prompt Library
- A certificate upon completing the training course that can be submitted for CPE credits in compliance with NASBA standards set by CPE providers
- A digital badge and TAISE certificate upon passing the exam

Unlike other CSA certificate programs, **TAISE is offered exclusively as a training + exam bundle. There is no self-study or exam-only option.**

How do I access the study guide?

You must purchase either the self-paced or instructor-led training to access the study guide. **There is no option to purchase the study guide or exam by themselves.**

Does CSA offer corporate training discounts for our teams?

Yes. Contact teamtraining@cloudsecurityalliance.org to learn more.

Do CSA Corporate Members receive any TAISE-related benefits?

Yes. Corporate members get training benefits, which can be used on TAISE. Contact membership@cloudsecurityalliance.org to learn more.

What is the TAISE Prompt Library?

The **TAISE Prompt Library** is an optional resource for TAISE students designed to complement the training. This resource provides a curated set of example prompts and techniques that show how to use large language models to explore, reinforce, and apply key ideas from each module. It is not an exam prep tool and has no bearing on the certificate test. Instead, it offers **real-world, job-ready exercises** that let professionals turn course concepts into hands-on skills.

You must purchase one of the TAISE training options to access the TAISE Prompt Library.

Taking the Exam

How do I access the TAISE exam?

Purchasing the [TAISE Exam Bundle](#) gives you access to the exam. It usually takes 24-72 hours after purchasing the bundle for your exam access to be added to your [CSA Exams](#) account. Once your access has been added, you will receive a confirmation email.

You can take the exam on CSA Exams at any time after purchase, either before or after completing the training course.

To access your exam:

- Go to [CSA Exams](#)
- Sign in or create an account using the same email address used for your bundle purchase
- From the CSA Exams homepage, click "Select Exam"
- Choose your available exam and start when you're ready

If you have not received your confirmation email after 72 hours, please contact CSA Support at support@cloudsecurityalliance.org.

What is the structure of the exam?

The TAISE exam is **open book, online, and not proctored**. It is made up of **60 multiple-choice questions** that have a single correct answer. These questions are selected randomly from a question pool. **The minimum passing score is 80%.**

The topics covered on the exam include:

- AI fundamentals
- GenAI architecture and design
- AI use cases
- Ethics, transparency, and explainability in AI
- AI model lifecycle and threat taxonomy
- AI governance, risk management, and compliance
- AI safety and security
- Cloud and AI security
- Data security and privacy in AI systems
- Continuous learning and adaptation with AI

How many questions are pulled from each module?

There are 6 questions per module.

Is there a time limit for the exam?

Yes, there is a 2-hour time limit (120 minutes).

Can I get extra time on the exam if English is not my first language?

Contact support@cloudsecurityalliance.org to be considered for testing accommodations.

Do you offer in-person testing?

No. You do not need to go to a testing center. The exam is available online at any time.

Do I need to schedule a testing date?

No. It is not necessary to schedule a time for the TAISE exam.

What hardware and software requirements do I need to take the exam?

There are no hardware requirements or specific programs you need to install in order to take the exam. Please ensure that you have a steady internet connection before starting to ensure you have the best experience taking the exam.

Do you offer any testing accommodations for learning disabilities?

Yes, contact support@cloudsecurityalliance.org to request testing accommodations.

When do I find out my exam results?

The results are immediate. You will know your score as soon as you finish the exam.

Can I review the questions I got wrong so I know what to study for future attempts?

In an effort to maintain the integrity of the exams, the platform is designed to avoid giving out the answers to specific questions. However, in order to assist those that do not pass the test to study for future attempts, the exam platform will provide you with the number of questions you answered correctly from each module.

To review any attempts you've made in the past, click on Exam Results in the Exams menu. Click into each attempt and scroll down to see the module breakdown under certificate details. This can help you understand which areas of the material you should focus on when you study.

Exam Attempts

How many attempts at the exam are included with my token?

Each regular token includes 2 attempts at the exam.

Does my exam token expire?

Yes. Your exam token expires 2 years from the date it was issued. If necessary, it can be extended for 6 months at a time. Contact support@cloudsecurityalliance.org to request an extension.

If I pass the exam on my first attempt, can I give my second attempt away to someone else?

No.

If I fail my first attempt, is there a waiting period to take my second attempt?

No, there is no enforced waiting period between attempts. However, we recommend taking time to study after failing an attempt.

How do I get more TAISE exam tokens without repurchasing the training?

Contact support@cloudsecurityalliance.org if you require extra exam attempts.

After Passing the Exam

How do I get my TAISE Certificate?

After successfully passing the TAISE exam, **your certificate PDF will be available to download from your CSA Exams account**. The certificate displays your name, the email associated with your CSA Exams account, and your verification code.

How can I claim a TAISE digital badge?

After successfully passing the TAISE exam, you can follow these steps to claim your digital badge:

- Log in to the CSA Exams site
- Go to the "Exam Results" section
- Click on the "Claim Badge" link
- Click on the "I Consent" button to give CSA your consent to share your certification record details (name, surname, email address) with Credly, the digital badge provider
- Receive (within minutes) an email from Credly with further instructions

Can I claim CPE credits for the training?

Yes, you will be rewarded with a certificate upon completing either type of TAISE training course. This certificate can be submitted for CPE credits in compliance with NASBA standards set by CPE providers. The self-paced training counts for 21 course hours. The course hours for instructor-led training varies depending on the instructor and course.

How can I continue to engage with CSA?

TAISE is just the beginning! Consider these other CSA activities to get the most out of your newfound AI knowledge:

Read AI research publications: CSA Research is created by the industry, for the industry. Check out our collection of [AI guidance](#) that can help you deepen the knowledge you gained from TAISE.

Watch AI webinars and event sessions: CSA events range from cutting-edge webinars and virtual or in-person conferences, to in-depth workshops and global summits. Check out our upcoming [AI-related events](#), or watch past AI sessions and webinars on the [CSA YouTube channel](#).

Join the AI Safety Initiative: This coalition of trusted experts converges to develop and deliver essential AI guidance and tools that empower organizations of all sizes to deploy AI solutions that are safe, responsible, and compliant. The easiest way to get involved is to complete the [AI Safety Initiative Interest Form](#). If you're ready to jump in, you can also join the [AI Safety Working Group](#).

Continue your CSA training journey: Several other CSA training programs are waiting for you. To gain in-depth security knowledge, consider studying for our [Certificate of Cloud Security Knowledge \(CCSK\)](#) or [Certificate of Competence in Zero Trust \(CCZT\)](#). For quick dives into specific topics, consider one of our [Cloud Infrastructure Security Training](#) courses. Topics include top cloud threats, cloud key management, DevSecOps, Software-Defined Perimeter, and more.
